PROFESSIONAL PROFILE

Full Stack Python Developer with 4+ years of hands-on experience building scalable web applications using Python, Django, FastAPI, Flask, and React.js. Proven track record in designing SaaS platforms, EHR systems, and ride-sharing apps with real-time collaboration and multi-tenant architectures. Strong problem solver with a passion for clean code, system optimization, and delivering impactful user experiences.

EXPERIENCE

Software Engineer - Full Stack Python Developer

May 2023 – Present

BMV System Integration Pvt Ltd

Ahmedabad, India

- Lead development of SaaS-based applications (ticket management, hospital inventory, EHR systems) with multi-tenant architecture and secure data isolation.
- Implemented real-time synchronization features ensuring seamless collaboration across distributed teams.
- Optimized API performance (FastAPI/Django/Flask) and integrated React.js for dynamic, responsive interfaces.

Python Developer

Oct 2021 – Feb 2023

Maquinistas Pvt Ltd / Softskillers Pvt Ltd

Ahmedabad, India

- Developed and deployed REST APIs in Django powering a proprietary ride-sharing platform.
- Integrated Google APIs for geolocation, route optimization, and map features.
- Collaborated with cross-functional teams to deliver scalable solutions with minimal downtime.

PROJECTS

Aroma (SaaS Ticketing System) | Python, Django, React.js

- Built multi-tenant SaaS ticket management platform with subdomain isolation, enabling organizations to manage work-flows securely and collaboratively.

SCIMS (Hospital Inventory System) | FastAPI, React.js

- Developed hospital inventory software with real-time stock tracking, automated procurement, and stock alerts, reducing supply wastage significantly.

Green Primary Care (Healthcare EHR) | Flask, React.js

- This is a Health Practice Management software with core features such as Appointment Scheduling and Patient Data Management, fully compliant with HIPAA regulations. I worked closely with the Backend and Frontend team to implement the client's ideas into different functionalities.

Doxer / Mylifto Rider (Ride-Sharing Platform) | Django, REST API, Ajax, Google APIs

- Created ride-sharing platform similar to Uber, supporting real-time ride requests, driver-passenger matching, and route optimization.

Quickfeet (Training App) | Django, REST API, Ajax, CronJob

- Developed a game-like sports training application integrating Bluetooth-enabled devices for real-time tracking and performance feedback, enhancing player training effectiveness.

EDUCATION

Bachelor of Computer Applications

2018 – 2021

Bholabhai Patel College of Computer Studies

Gujarat, India

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React.js, Redux, Ajax

Backend: Python, PHP, Django, FastAPI, Flask, REST APIs, Celery, Redis

Databases: PostgreSQL, MongoDB, MySQL, SQL

Version Control: Git, GitLab

Cloud DevOps: AWS, DigitalOcean, Microsoft Azure, Amazon CCP, cPanel

Tools Collaboration: Jira
